

Intermediate questionnaire for teachers

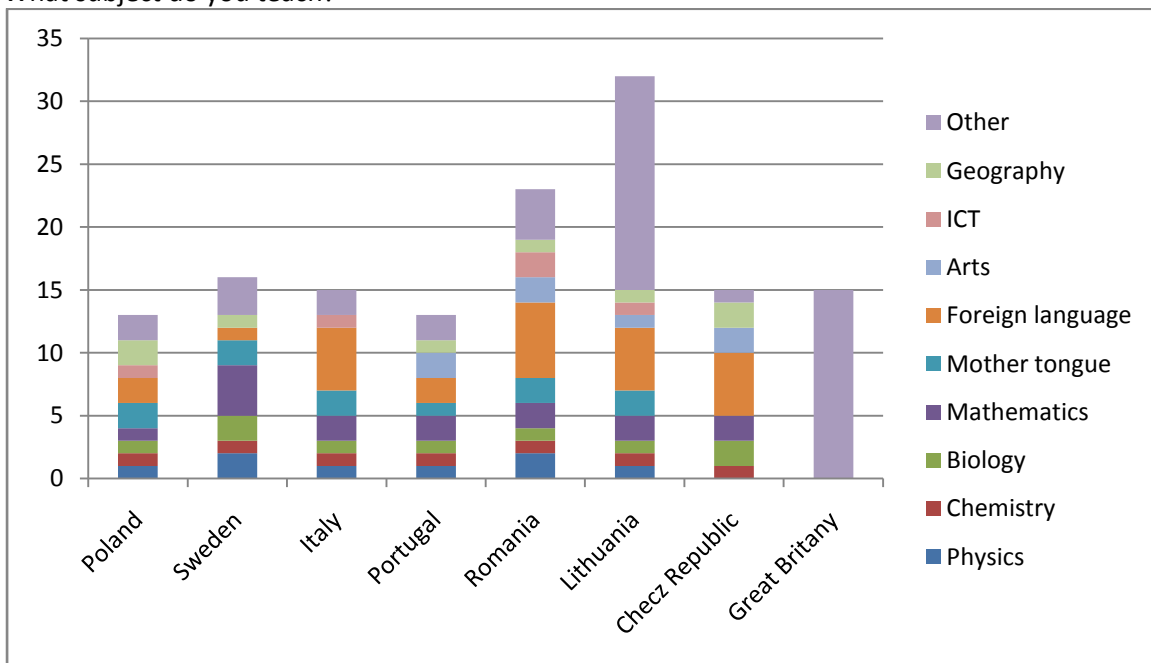

The aim of this questionnaire is to look into your knowledge and personal views on environmental awareness.

A

1. Have you been involved in an international project before?

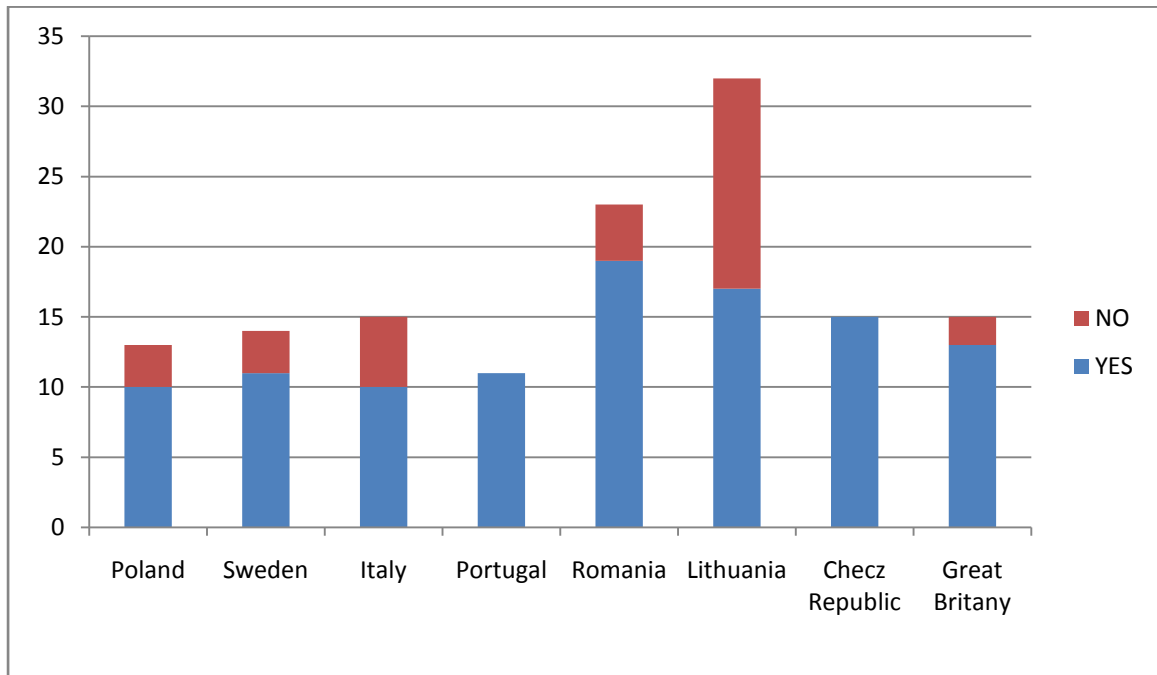

2. What subject do you teach?

Other: Primary School, Social Science

3. Have you ever communicated in English (sharing views/information) with other teachers in Europe?

4. Share your opinion about the development of the project in your school.

Great oportunites for both staff and children.

Project impacted on the curriculum.

Some exciting creativity weeks been held.

Slow to start with but it really took off for us after the training in our school.

Its really good because we can all get involved –its not the same people who visit other countries and have the oportunitites – we all do.

Looking forward to this year when we will be teaching more lessons around the global goals

Love it – brings such a different dimension and dynamic to our school

5. How will you benefit from the involvement in this project?

My subject knowledge has improved already.

My knowledge of problems facing other countries is improving.

I will learn more.

I will have a greater awareness of environmental issues both in this country and across Europe.

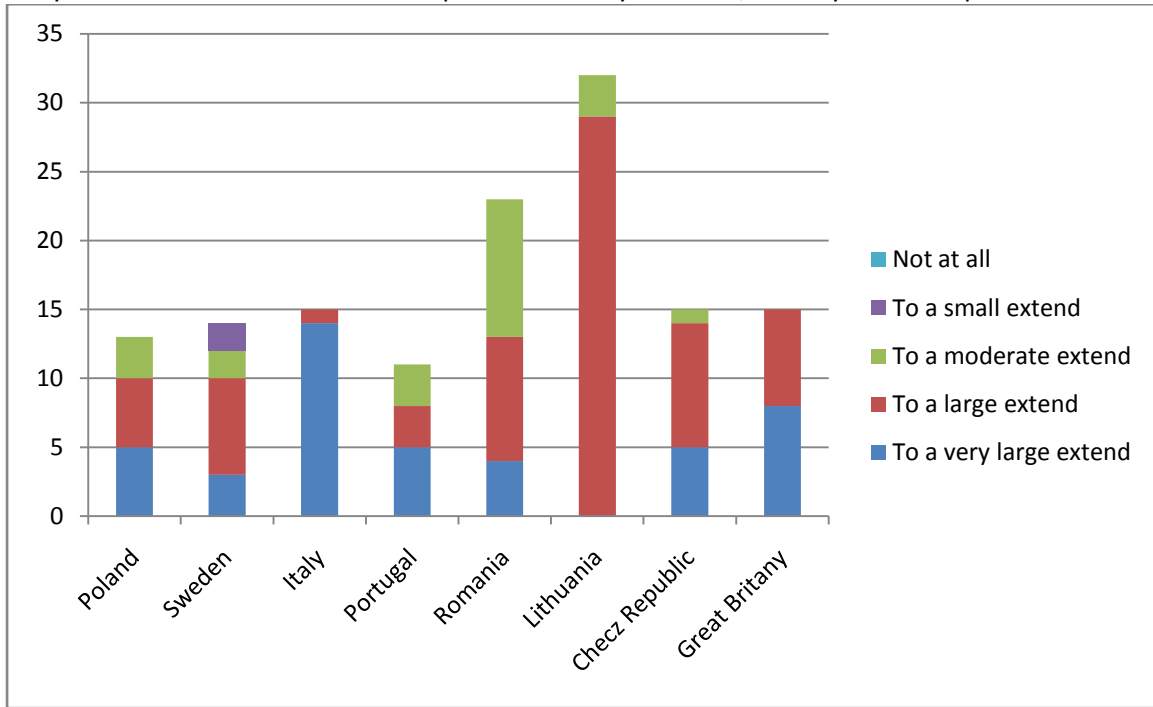

My teaching will improve.

As well as knowing more about issues facing others, my relationship with some of the children has improved through accompanying them abroad.

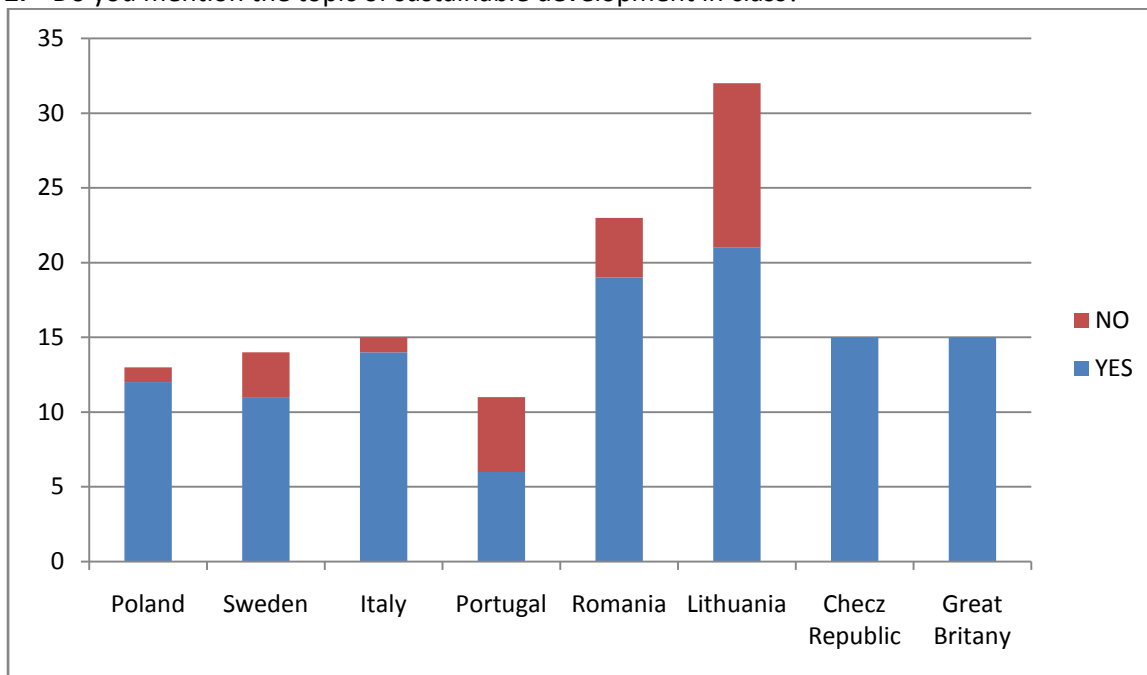

B

1. Are you aware of the environmental problems that your town/country has to cope with?

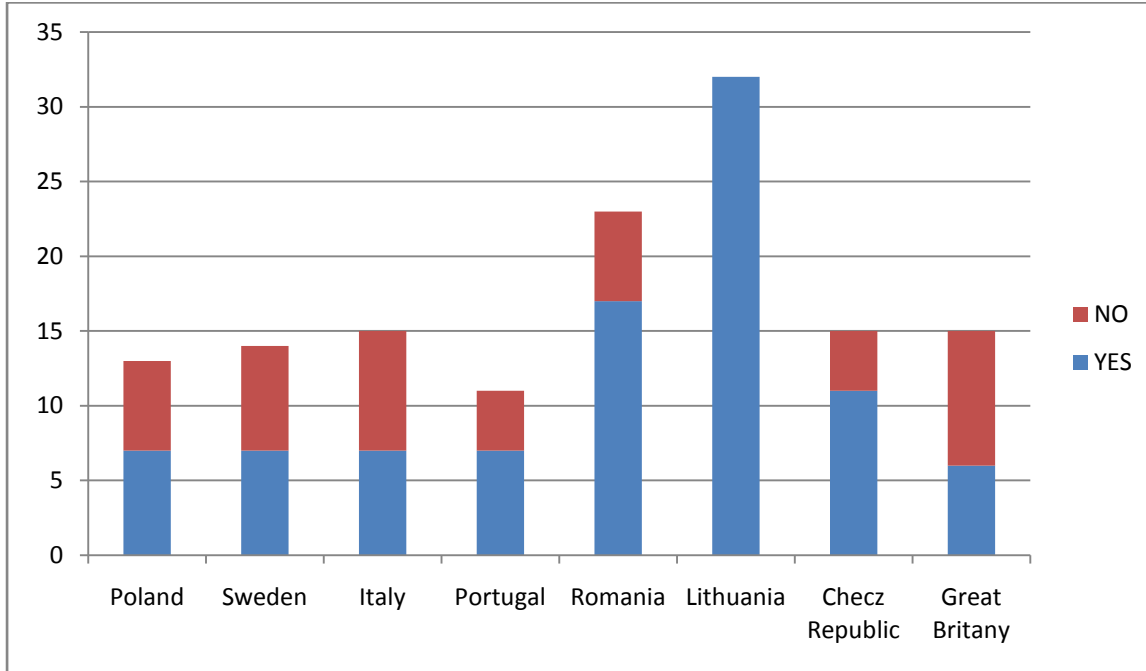

2. Do you mention the topic of sustainable development in class?

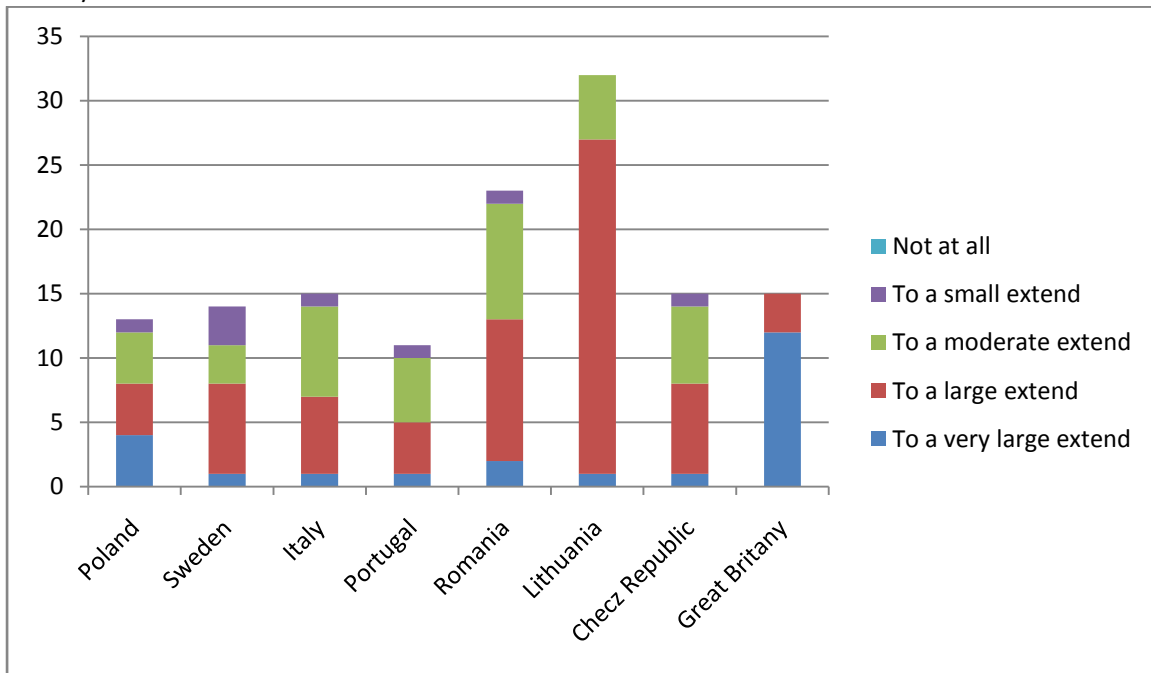

3. Have you ever organised extracurricular activities to improve/ protect the environment?

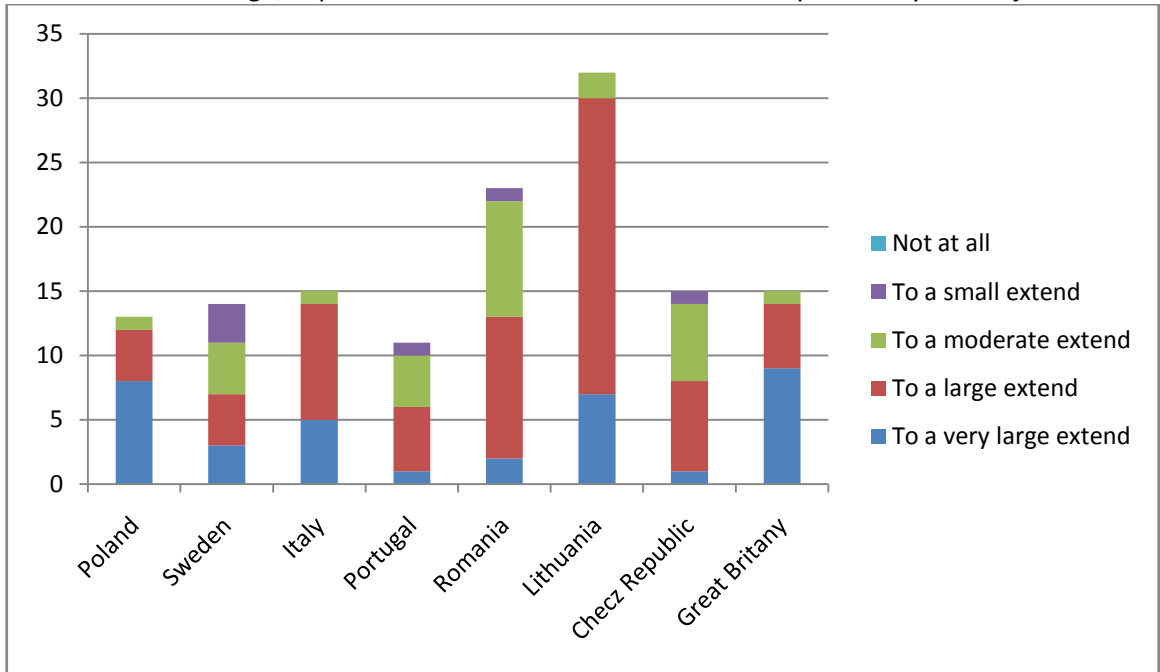

In case you have, give details!

4. Do you know tools/methodologies/strategies to approach the topic of environmental education in a formal/non formal context?

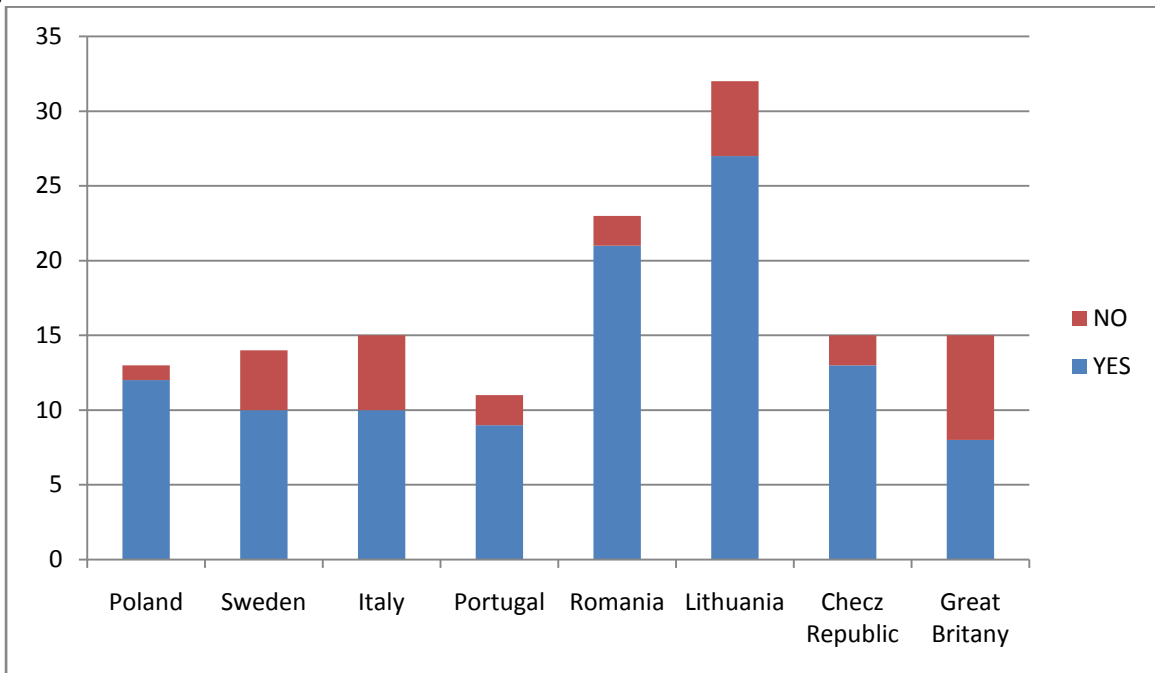

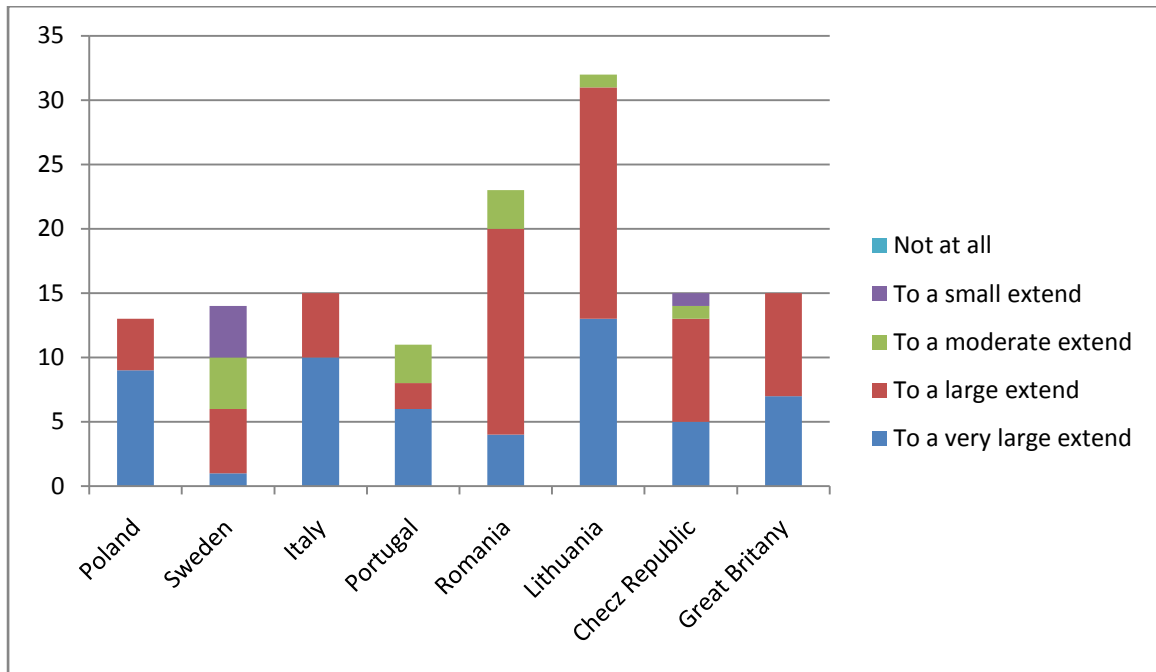

5. Do you know how to design/implement activities on sustainable development in your subject?

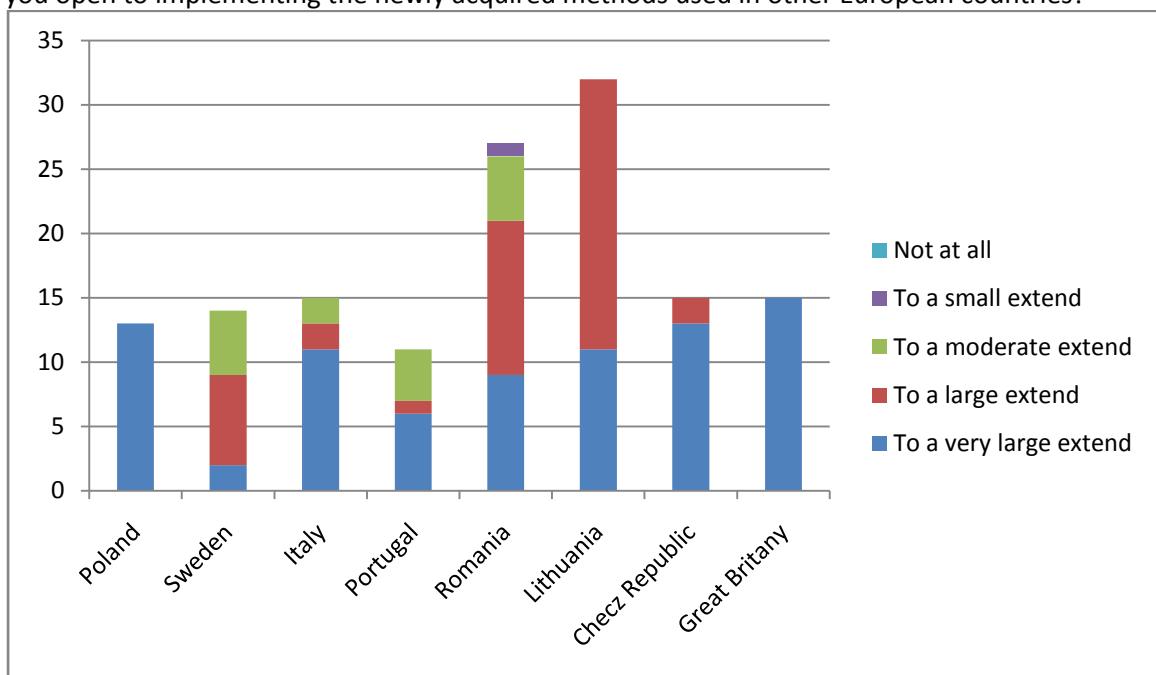

6. Do you know any ICT tools that can be integrated into the teaching of environmental issues in your subject?

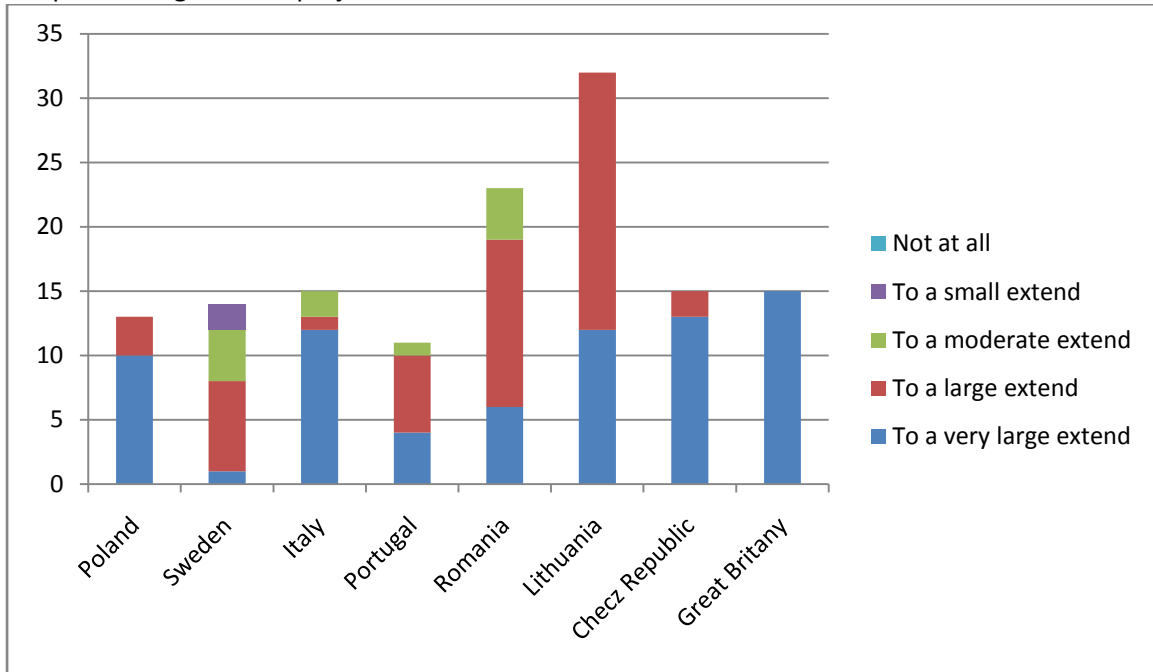

7. Are activities in the field of non- formal education, environment protection and IT integrated tools useful?

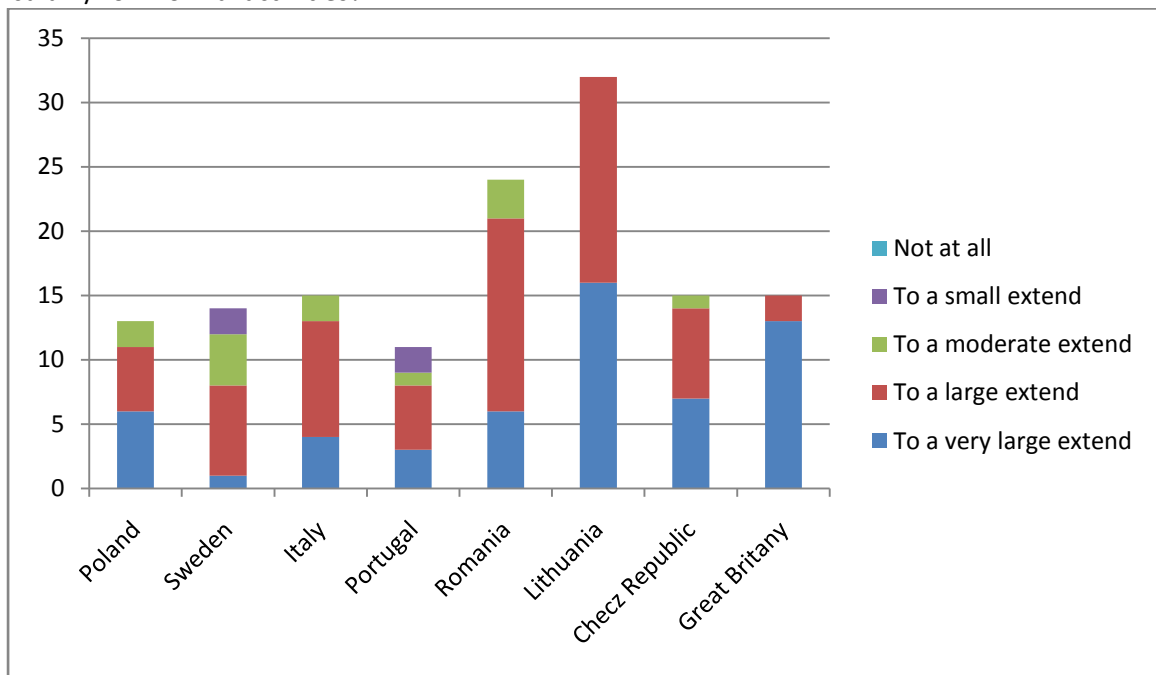

8. Are you open to implementing the newly acquired methods used in other European countries?

9. Are you interested in the improvement of your teaching skills through an exchange of teaching samples throughout the project?

10. Can you motivate and stimulate students to take part in activities integrated into the curriculum/non- formal activities?

11. Do you think that this project will improve your performance personally and professionally?
